R28100 AC/DC CONVERTER

RACK TYPE CONVERTER

GENERAL SPECIFICATIONS

| | |
|---|---|
| » Smart circuit provides three phase charge 6 bulk, absorption, float. | » Military type connection wires for optional use |
| » It can monitor battery system between 40-200 Amper value range with wide range of models. | » It has dimout mode feature. |
| » Multiple isolated outputs; show Amper meter total output current. | » Military type connectors |
| » The sensor for optional use, adjusts output voltage based on battery heat. | » 11 O db Buzzer |
| » Current classification prevents overloading. | » It has passed MIL STD 81 OG, MIL STD 127E, MIL STD 461 G Tests. |
| » Charge status is displayed on control unit. | » MTBF is 120.000 hours. |
| » It is conformant to EMI-EMC. | » It can be remote controlled thanks to CANBUS. |
| » It has 2-years guarantee. | » R28100 Analog and CANBUS Output |
| » Automatically stops when engine is started. | |
